SERVICES

Client service

A well-trained team of mechanics is in charge of all the maintenance and repairing of the machines, on the building-site or in our workshop. Heavy investements have been made into tools and equipment in our workshop. The mecanics assist regularly at trainings and seminars in order to keep themselves informed about the latest technical developments of the machines.

Our vehicles are there to provide us with great mobility accross the country. These well-equiped vans allow us to do a lot of the interventions directly on your building-site. For the maintenance of the machines of the newewst generation, we use computers in order to optimize the settings of the machines.

IT-technology is also very present in the maniging of our store of Genuine parts. Powerful softwares supplied by the manufacturers allow us to find rapidly references and prices in our catalog. We have also on-line connections to our suppliers, in order to improve efficiency and rapidity of the orders.

We only supply guaranteed genuine parts and most of them are in-stock. Our stock is updated every week and an over-night transport service allows us to deliver most of the parts that are not in stock within 24 hours.

SERVICES

Consulting

We have over 30 years of experience in the construction sector and a lot of experience in other sectors too, so we are able to assist you and give some advice for free. An example among others: With a specially designed software for scaffolding and formworks, our sales representative can find on the basis of your plans rapidly the best solution for your project.
